

SVI-757 MSX RS-232 INTERFACE CARTRIDGE

SVI-757 MSX RS-232 Interface Cartridge provides Electronic Industrial Association (EIA) standard for data communication between your computer and external equipment.

With the installed cartridge, your computer can link up with another computer, modem, teletype equipment or printer etc. Since the cartridge is MSX compatible, you can connect it to the SVI-728 or other MSX computer.

SPECIFICATION

Baud Rate : 50 - 19200 bps
(15 different baud rate)

Counter Channel Usage : CH0 - receive baud rate clock

CH1 - transmit baud rate clock

CH2 - used by application
(e.g. time out counter)

Power Consumption : + 5V 250mA
+ 12V 25mA
- 12V 28mA

Dimensions (mm) : 170(L) x 123(W) x 32(D)

Retrocomputing
